

Amazing Ants

Ants have three body parts:

Abdomen, thorax, and head.

They can be different colors:

Brown, black, yellow, or red.

Ants often follow each other

Walking in a line.

Some carry a few leaves on their backs

As they march along in time.

With six quick, little legs,

Ants are quite fast for their size.

They don't see very well,

Even though they have eyes.

Some ants live underground

And some live up in trees.

Lifting 20 times their weight is a piece of cake.

Ants are stronger than you or me!
