

Pets

Written by John Kyros

Have you ever wanted a pet? Do you have a family pet? Many people like to have pets. Pets are animals that people keep in their homes or in their yards. A pet is a friend. A pet is a companion.

What kinds of pets can you name?

Pets need people to take care of them. If you have a pet, you have to take good care of it. You have to feed a pet. You need to give your pet water, too.

All pets need care. A snake needs food and a safe place to live. A goat does, too. A spider does, too.

A pet needs a place to sleep at night.

Some pets need to be washed or brushed. Does your pet have a tank or a cage? It must be cleaned. This keeps your pet healthy and feeling well.

People have all kinds of pets. Insects are pets. Mice are pets. People have reptiles and cats for pets. Every one of them needs food and clean water. They all need a place to live.

Some pets are cute. Some pets are funny.

Many pets need exercise. They can't just sit still.

Some pets also need to learn rules. Rules keep you and your pet safe.

Some pets need to see a doctor every year, just like you!

Most of all, a pet needs love.
